

# SOFTWARE ENGINEERING LAB

## 1. Git v/s GitHub

Git is a version control system that lets you manage and keep track of your source code history. GitHub is a cloud-based hosting service that lets you manage Git repositories.

## 2. Creating an Account

Here are the steps to create a GitHub account in plain text:

- Open your web browser and go to <https://github.com>.
- Click on the "Sign up" button in the upper right corner.
- Enter your desired username, email address, and a strong password.
- Complete the CAPTCHA to verify you're not a robot.
- Choose your GitHub plan (Free or Paid) and click "Continue".
- Check your email inbox for a verification email and click the link to verify your email address.
- Complete additional setup steps (optional), such as adding a profile picture or bio.
- Start using GitHub by exploring repositories, creating projects, and collaborating.
